SHWETA SHARMA

Product Designer | UX Researcher | AI/ML-Grounded Design

Philadelphia, PA 19104 (Open to Relocate) | +1 (947) 466-5006 | shwetayeolesharma@gmail.com | linkedin.com/in/sharmashweta08 | shwetasharma.tech | github.com/yeoleshweta

Professional Summary:

Product Designer and UX Researcher with 5+ years of end-to-end product design experience across e-commerce, agriculture, wellness, and healthcare AI. Specializes in research-driven, data-informed design – grounding decisions in usability studies, behavioral analytics, and quantitative testing. Brings a rare technical layer: MS in AI & Machine Learning (Drexel University), hands-on NLP/ML experience, and fluency in AI product constraints and evaluation. Track record includes an 11% conversion lift at Capita, a 35% engagement lift at UrbanFit, and a 25% reduction in time-to-specification at John Deere. Works fluidly across Figma, Adobe XD, design systems, React/Tailwind front-ends, and data pipelines - from research through shipped product.

Core Competencies:

Product Design • UX Research • User-Centered Design • Interaction Design • Design Systems • Wireframing & Prototyping • Usability Testing • A/B Testing • Design Thinking • Information Architecture • Cross-Functional Collaboration • Stakeholder Management • Agile/Scrum • Accessibility (WCAG 2.1) • Data-Informed Design • AI/ML Product Design • LLM Evaluation • 0-to-1 Product Development

Professional Experience:

Data Scientist Co-op - UX & AI Evaluation
Mar 2025 – Mar 2026

American Board of Internal Medicine (ABIM) · Philadelphia, PA

- Designed an annotation taxonomy and labeling protocol for clinical communication NLP, translating board scoring rubrics (Calgary-Cambridge, NURSE, SHARE) into machine-readable categories with inter-rater reliability (IRR) protocols – applying UX research methodology to AI training data quality.
- Built rubric-based evaluation frameworks for AI outputs covering accuracy, label consistency, and edge-case behavior, anchoring AI evaluation in clinical measurement standards rather than model convenience.
- Prototyped and deployed Bias Checker, a live healthcare AI bias-detection tool: fine-tuned RoBERTa + LoRA classifier, GPT-4o explainability layer, Next.js frontend, and Flask backend, deployed via Hugging Face Spaces and Vercel.

UX Researcher & Senior Technical Lead
Oct 2022 – Sep 2024

John Deere · Pune, India

- Led mixed-methods UX research across 6+ product teams – contextual inquiry, usability testing, stakeholder interviews, and behavioral analytics – to shape quarterly roadmaps and feature prioritization.
- Applied the Double Diamond framework end-to-end: discovery (contextual inquiry, stakeholder interviews), define (affinity mapping, persona creation, journey mapping), validated design recommendations delivered to engineering.
- Designed a self-serve survey platform for 250+ products, reducing setup time by 60%, raising completion rates by 25%, and eliminating developer dependency through thoughtful information architecture and interaction design.
- Established the UX research practice as the sole researcher on the India team – built case studies, ran design-thinking workshops, and authored a PM-UX Playbook that increased PM UX literacy by 80%; synthesized 120+ feedback channels into core product KPIs, driving a 25% reduction in time-to-specification.

Product Designer
Apr 2022 – Oct 2022

UrbanFit Wellness · Pune, India

- Owned end-to-end product design for the UrbanFit fitness platform and client engagements (Stories By Children, brand identity) – from discovery through final engineering handoff.
- Built the UrbanFit design system from scratch in Figma – component libraries, typography and color tokens, interaction patterns, and responsive layout grids - applying atomic design principles so new features shipped without redesign debt.
- Shipped a platform redesign informed by Hotjar heatmaps, session recordings, and moderated usability testing, delivering a 35% engagement lift, a 28% bounce-rate drop, and a 2.5× increase in newsletter sign-ups.

UI/UX Designer - E-Commerce Personalization
Jan 2018 – Dec 2021

Capita (Arcadia Group) · Pune, India

- Owned end-to-end UI/UX for 7 flagship UK retail brands (Topshop, Topman, Dorothy Perkins, Burton, Wallis, Miss Selfridge, Evans) across desktop, tablet, and mobile in Adobe XD, Sketch, and Figma.
- Drove retail personalization design on Qubit's ML platform – combining behavioral segmentation, funnel analysis, and A/B testing with qualitative usability sessions – delivering an 11% conversion lift across category, product, and checkout pages.
- Built and maintained client-specific design systems and pattern libraries; translated designs into production HTML5/CSS3/jQuery and owned email-safe builds in IBM Silverpop for high-volume promotional campaigns.

Featured Projects:

Bias Checker - Healthcare AI Bias Detection Tool *RoBERTa + LoRA · GPT-4o · Next.js · Flask · Hugging Face Spaces · Vercel*

- Solo-built a deployable bias-detection system for clinical vignettes; published a taxonomy of medical bias categories as the durable research artifact and shipped a full-stack product with a React/Next.js frontend and Python backend.

CentralPerk - Personal Multi-Agent AI System *LangGraph · FastAPI · React + Vite + Tailwind · Python (In Active Development)*

- Designing a personal multi-agent AI system with a LangGraph orchestrator, focused on agent-handoff UX, surfacing what the system did versus deferred, and deliberate non-capture design applied to AI interaction patterns.

John Deere Self-Serve Survey Platform *Figma · Research Ops · Information Architecture*

- Designed and shipped a self-serve survey tool for 250+ internal products - a 60% setup-time reduction, a 25% completion-rate improvement, and zero developer dependency post-launch.

Skills:

Design Tools: Figma, Adobe XD, Sketch, Mural, Miro, InVision, Zeplin

Design Practice: Design systems, component libraries, atomic design, interaction patterns, information architecture, responsive design, accessibility (WCAG 2.1), email-safe HTML/CSS

Research Methods: Contextual inquiry, moderated & unmoderated usability testing, diary studies, card sorting, journey mapping, affinity mapping, persona development, design sprints

Quantitative: A/B testing, behavioral analytics, heatmaps (Hotjar, FullStory), SUS scoring, segmentation, statistical significance testing, Google Analytics, Amplitude

AI / ML: Annotation taxonomy, IRR protocols, LLM evaluation, AI bias detection, rubric design, NLP (BERT, RoBERTa), Python, Label Studio, prompt evaluation, generative AI product design

Front-End (light): React (Vite + Tailwind), Next.js, HTML5/CSS3, jQuery, Storybook

Tools & Collaboration: Jira, Dovetail, Git, SQL, Tableau, Power BI (DAX), Agile/Scrum, cross-functional stakeholder management

Education:

M.S. Computer Science - AI & Machine Learning Sept 2024 – Mar 2026
Drexel University, College of Computing & Informatics · Philadelphia, PA | GPA: 3.97/4.0

B.S. Computer Science June 2010 – May 2015
G.H. Raisoni College · Pune, India | CGPA: 7.89/10

Certifications & Volunteering:

Google UX Design Professional Certificate:

- Google UX Design Specialization
- Understanding Research Methods
- Create High-Fidelity Designs and Prototypes in Figma
- Foundations of User Experience (UX) Design
- Conduct UX Research and Test Early Concepts
- Start the UX Design Process: Empathize, Define, and Ideate
- Build Dynamic User Interfaces (UI) for Websites
