Shweta Sharma

Quantitative UX Researcher | Survey Design & Behavioral Analytics | B2B & B2C Products

Philadelphia, PA · +1 (947) 466-5006 · shwetayeole09@gmail.com · linkedin.com/in/sharmashweta08 · shwetasharma.tech

PROFESSIONAL SUMMARY

UX researcher with 5+ years running user research, surveys, and behavioral analytics across B2B and B2C products. Comfortable across both quant and qual methods, from survey design and behavioral analysis to usability testing and stakeholder reporting. Experienced with tools like Qualtrics, FullStory, and Hotjar, and with building research programs that scale across product teams. At John Deere, built research infrastructure used across 250+ products. At Capita, research work contributed to an 11% conversion lift. Currently finishing an MS in AI and Machine Learning at Drexel (June 2026).

PROFESSIONAL EXPERIENCE

American Board of Internal Medicine (ABIM) Mar 2025 – Mar 2026

Innovation Analyst — Data & Research | Philadelphia, PA

- Designed annotation protocols and measurement instruments for clinical communication NLP, translating board scoring rubrics (Calgary-Cambridge, NURSE, SHARE) into structured machine readable constructs with embedded validation logic — the same instrument design process used in large scale behavioral survey work.
- Established inter-rater reliability (IRR) benchmarks across 985+ clinical transcripts: Cohen's κ per construct, Landis and Koch banding, and Macro-F1 of 0.76, equivalent to managing survey data quality at scale with rigorous agreement thresholds.
- Built rubric based evaluation frameworks covering accuracy, label consistency, and edge case behavior; anchored AI evaluation to validated clinical board benchmarks and ACGME governance requirements.

John Deere Oct 2022 – Sep 2024

UX Researcher & Senior Technical Lead | Pune, India

- Designed and managed a self serve survey platform built on Qualtrics for 250+ products, including intercept targeting logic, embedded data configurations, and XM Directory management, cutting setup time 60%, raising completion rates 25%, and eliminating developer dependency entirely.
- Built and automated Qualtrics dashboards to track product health KPIs across multiple product lines; translated complex survey outputs into executive ready stakeholder narratives for PMs, designers, and senior leadership.
- Led mixed methods UX research across 6+ product teams: contextual inquiry, moderated usability testing, and behavioral analytics using FullStory and session recordings to surface insights that shaped quarterly roadmaps.
- Synthesized data from 120+ feedback threads and 15+ research sessions; defined core product KPIs that drove a 25% reduction in time to specification and directly informed backlog prioritization.

UrbanFit Wellness Apr 2022 – Oct 2022

UX Researcher & UI Designer | Pune, India

- Ran quantitative and qualitative research across the platform: Hotjar heatmaps, SurveyMonkey surveys, moderated usability testing, journey mapping, and persona development; end to end redesign delivered 35% engagement lift and 28% bounce rate reduction.

Capita — Arcadia Group Jan 2018 – Dec 2021

UI/UX Designer (promoted from Senior Executive, UI/UX in 2019) | Pune, India

- Led retail personalization research on Qubit's ML driven behavioral analytics platform, combining quantitative analysis (segmentation, funnels, A/B testing) with qualitative usability sessions across category, product, and checkout pages, and delivered an 11% conversion lift across Topshop, Topman, Dorothy Perkins, and other Arcadia brands.
- Led moderated and unmoderated usability testing during Magento migration; prioritized issues and collaborated with UK and India PMs and engineers to deliver iterative improvements against sprint cycles.

PROJECTS

Behavior Analysis Model — ABIM **Measurement Design · NLP Evaluation**

Innovation Analyst Co-op | American Board of Internal Medicine | 2025–2026

- Designed a rubric grounded measurement pipeline to assess physician communication quality across 985 clinical transcripts, covering instrument design, scaled annotation, and classifier validation across 11 behavioral constructs drawn from Calgary-Cambridge and NURSE frameworks.
- Established IRR benchmarks (Cohen's κ per construct, Landis and Koch bands) and achieved Macro-F1 of 0.76 across all 11 constructs; per-construct calibration tracked via ECE and Brier Score against clinical board standards.

ABTools Longitudinal Usability Study — John Deere Financial **Quant UXR · Longitudinal Design**

UX Researcher | John Deere | January – August 2021

- Designed and ran an 8 month longitudinal within subject usability study across the ABTools credit processing platform migration; SUS improved from 60.0 (below average) to 85.6 (excellent), clearing all industry and internal benchmarks in a single study cycle.
- Built a custom Qualtrics survey with 6 Likert scale usability dimensions plus SUS; administered identical instruments at baseline and after a familiarization period to isolate genuine usability gains from novelty effects. Thematic analysis of verbatims surfaced 35 improvement issues, and the Notes feature (flagged by 16/16 participants) entered the backlog as a high priority UX fix.

SKILLS & TOOLS

Survey & Analytics: Qualtrics (Intercept Surveys, XM Directory, Embedded Data, Dashboards, Workflows), A/B and Multivariate Testing, Behavioral Analytics, Segmentation, SUS, Heuristic Evaluation

Behavioral Analytics: FullStory, Hotjar, Qubit (ML personalization), Heatmaps, Session Analysis, Funnel Analysis, Cohort Analysis

Research Methods: Contextual Inquiry, Moderated and Unmoderated Usability Testing, Longitudinal Within Subject Design, Likert Scale Design, IRR (Cohen's κ), Affinity Mapping, Persona Development, Journey Mapping, Mixed Methods Research

AI / ML / NLP: NLP, ClinicalBERT, RoBERTa, Fine-Tuning, LoRA, Hugging Face, LangGraph, Synthetic Data, Python, SQL, PyTorch

Tools

Qualtrics · **Figma** · **Python** · **SQL** · **FullStory** · **Hotjar** · **Label Studio** · **Dovetail** · **Jira** · **Hugging Face** · **Adobe XD** · **Mural** · **Docker** · **IBM Silverpop**

EDUCATION

Drexel University, College of Computing & Informatics Expected June 2026

M.S. in AI & Machine Learning | Philadelphia, PA

G.H. Raisoni College of Engineering

B.S. in Computer Science | Pune, India | 2010–2015

CERTIFICATIONS

- Google UX Design Professional Certificate
- Research Methods — University of London
- Journey Mapping — Nielsen Norman Group (NN/g)
